Road to Hire

Road to Hire Cybersecurity Apprenticeship

Tech puts your future in your hands. Here at Road to Hire, we believe your hard work should be met with opportunity; and, with a focus in tech, doors will be opened that will shift your life's trajectory. But it's not easy. Breaking through in tech is challenging, and we know it takes a village. If you're ready to learn and be part of a community, this is the apprenticeship for you.

We're looking for talented, tech-hungry high school or GED graduates who are looking to break into the fields of Cybersecurity without a college degree! Being in tech isn't easy, but you'll be given access to world class resources, and state of the art facilities to learn and polish your craft.

About Joining this Apprenticeship

This is a rigorous, six-month, PAID Apprenticeship. You'll be paired with strong mentorship along the way, and learn the skills you need to pursue high-paying tech careers at premier Charlotte employers like Bank of America, Red Ventures, and Atrium Health.

When you join this cohort, you join a community. It will be your job to lift your peers as you climb, and in return, you can trust that they will do the same for you.

Cybersecurity and Professional Development

Throughout our program, students will learn technical and professional life skills to help them build lifelong habits for success.

Technical
